

	Andover Town Council To approve plans to create a parking area at Old Winton Road allotments.		Item No. 12
Produced for: Allotments Committee		By: Allotment Officer	Date of Report: 04 th June 2026
Background: In the past, complaints have been received from residents regarding plot holders parking near the Old Winton Road allotments. Some unsuitable plots at other allotment sites have been converted into parking areas for plot holders, and this solution has helped to alleviate some of these issues. The Site Warden has identified plots 12B and 12C, both half plots, as suitable areas to be converted into a parking area for plot holders. These plots were originally a single full-sized plot but were divided in November 2024 after a number of tenants found it difficult to cultivate the entire area. The two new half plots were subsequently let to new tenants; however, difficulties in maintaining and cultivating the plots have continued.			
Potential costs to create a parking area: Following the eviction from one half plot and the surrender of the adjoining half plot, the Site Warden and Councillor Reynolds assisted in bringing both plots back into a cultivated condition. C A Stevens have been asked to provide a quotation for the delivery of Road Plainings. The Site Warden and Councillor Reynolds have volunteered to distribute the material in order to make the area suitable for parking. Cost for 19 ton material including VAT and delivery = <u>£482.40</u>			
Recommendation: To approve plans to create a parking area at Old Winton Road allotments.
